

How to clone GitHub notes in to local folder

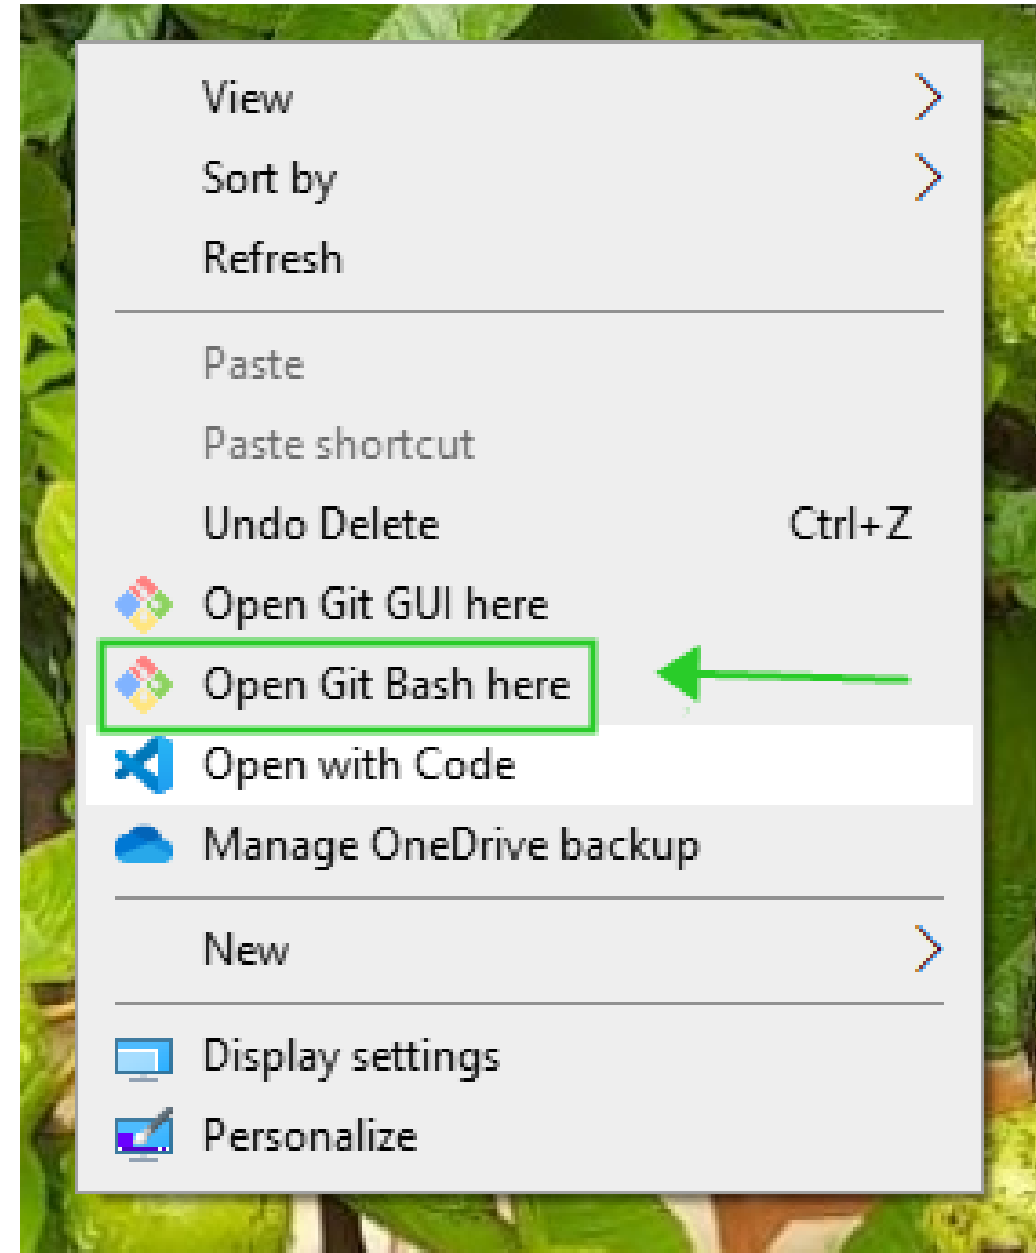

:- ##Night->Coder##

Open Git Bash

1:- Go to desktop and right click of mouse select this

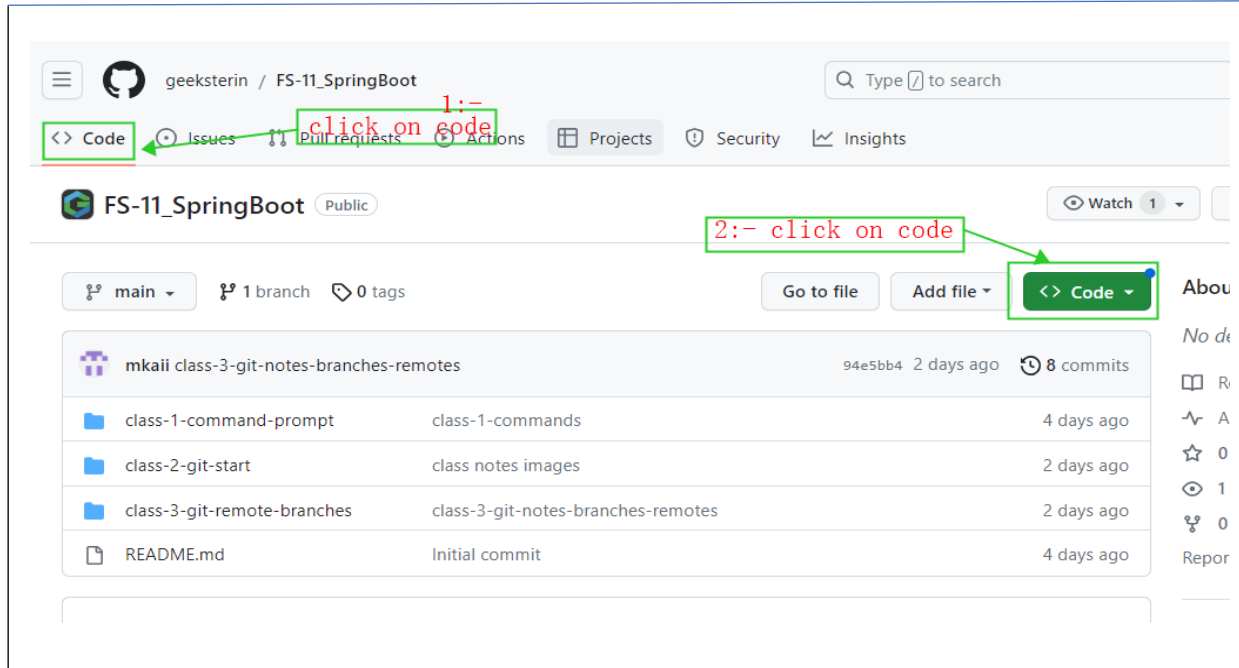

Create a folder

2:-Use this cmd:-

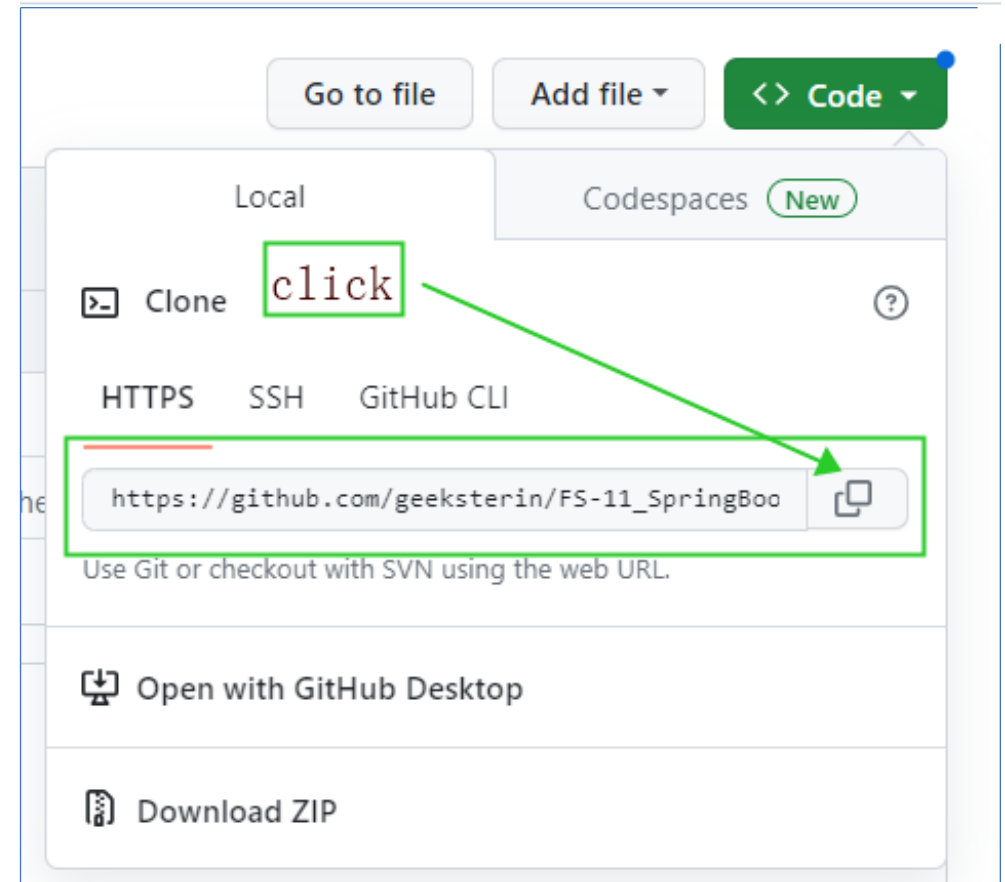

How to take link from GitHub

1:-How to find GitHub link

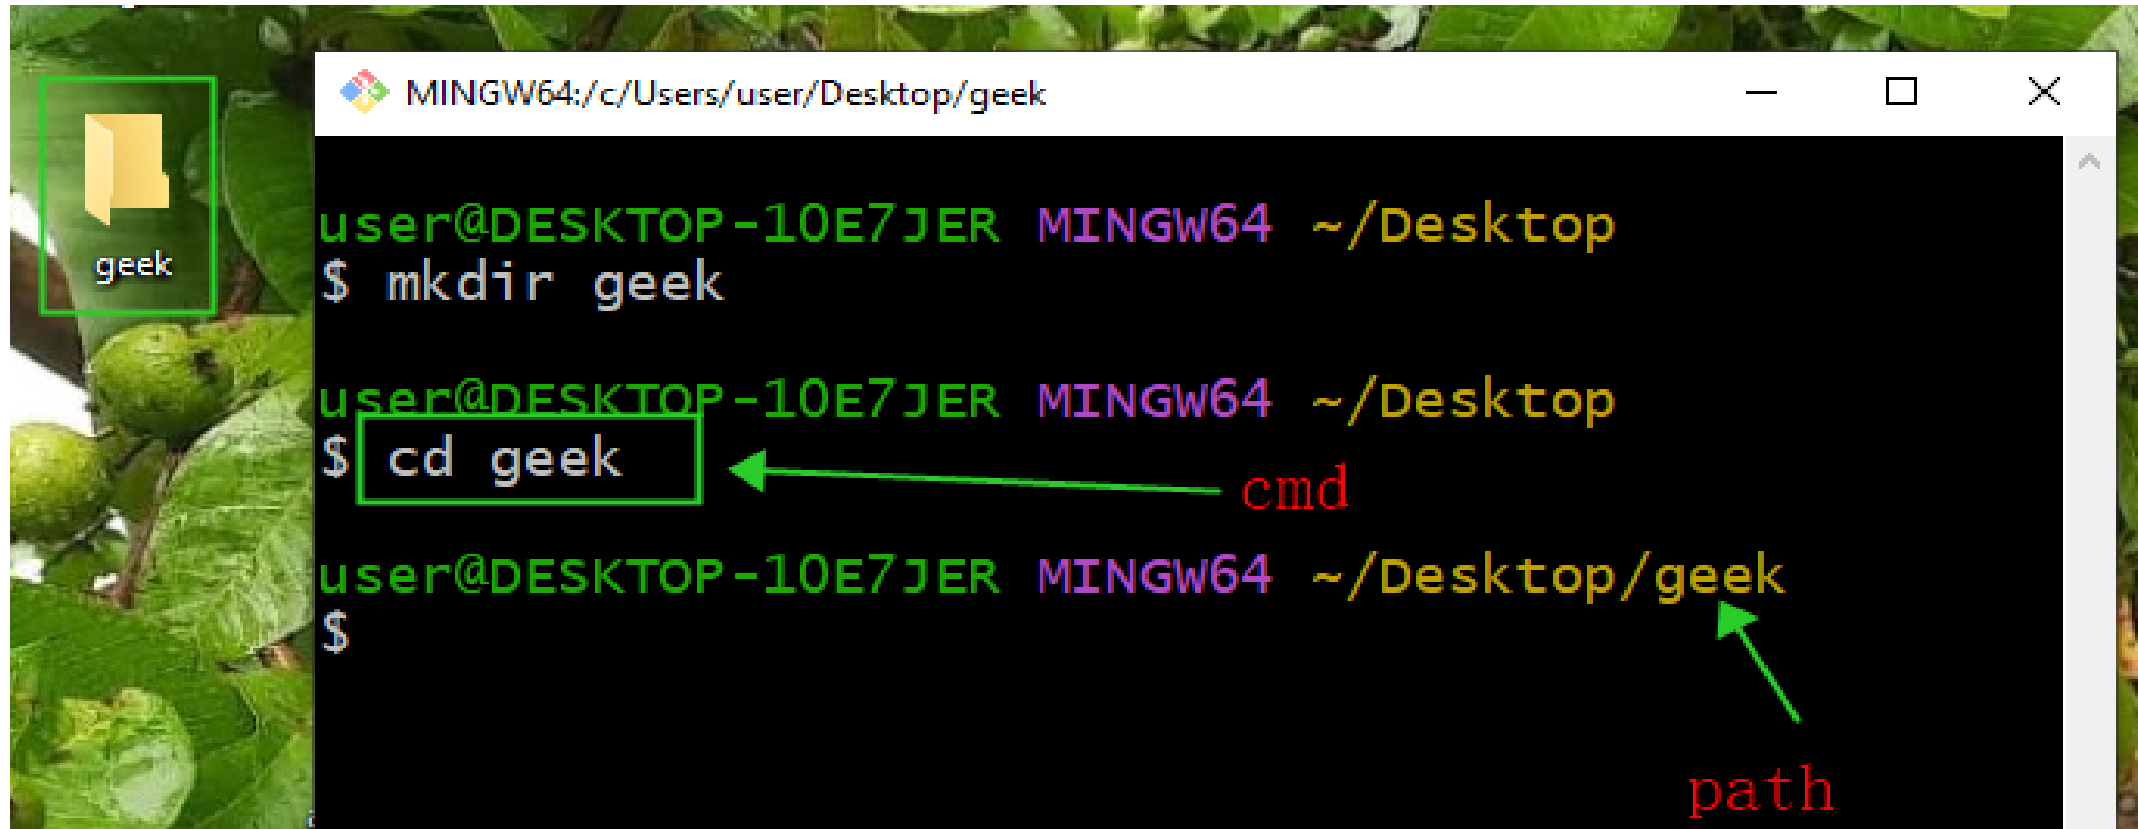

2:-How to find GitHub link

Go inside the folder

3:-Use command

The image shows a Windows desktop background with green foliage. On the left, a yellow folder icon labeled 'geek' is highlighted with a green rectangle. To its right is a terminal window titled 'MINGW64:/c/Users/user/Desktop/geek'. The terminal displays three lines of text: the first line shows the prompt 'user@DESKTOP-10E7JER MINGW64 ~/Desktop' and the command '\$ mkdir geek'; the second line shows the same prompt and the command '\$ cd geek', with a green box around 'cd geek' and a red arrow labeled 'cmd' pointing to it; the third line shows the prompt 'user@DESKTOP-10E7JER MINGW64 ~/Desktop/geek' and a single '\$' character, with a green arrow labeled 'path' pointing to the directory part of the prompt.

```
MINGW64:/c/Users/user/Desktop/geek

user@DESKTOP-10E7JER MINGW64 ~/Desktop
$ mkdir geek

user@DESKTOP-10E7JER MINGW64 ~/Desktop
$ cd geek

user@DESKTOP-10E7JER MINGW64 ~/Desktop/geek
$
```

Clone link

Use:- git clone <github link>

MINGW64:/c/Users/user/Desktop/geek

```
user@DESKTOP-10E7JER MINGW64 ~/Desktop
$ mkdir geek
```

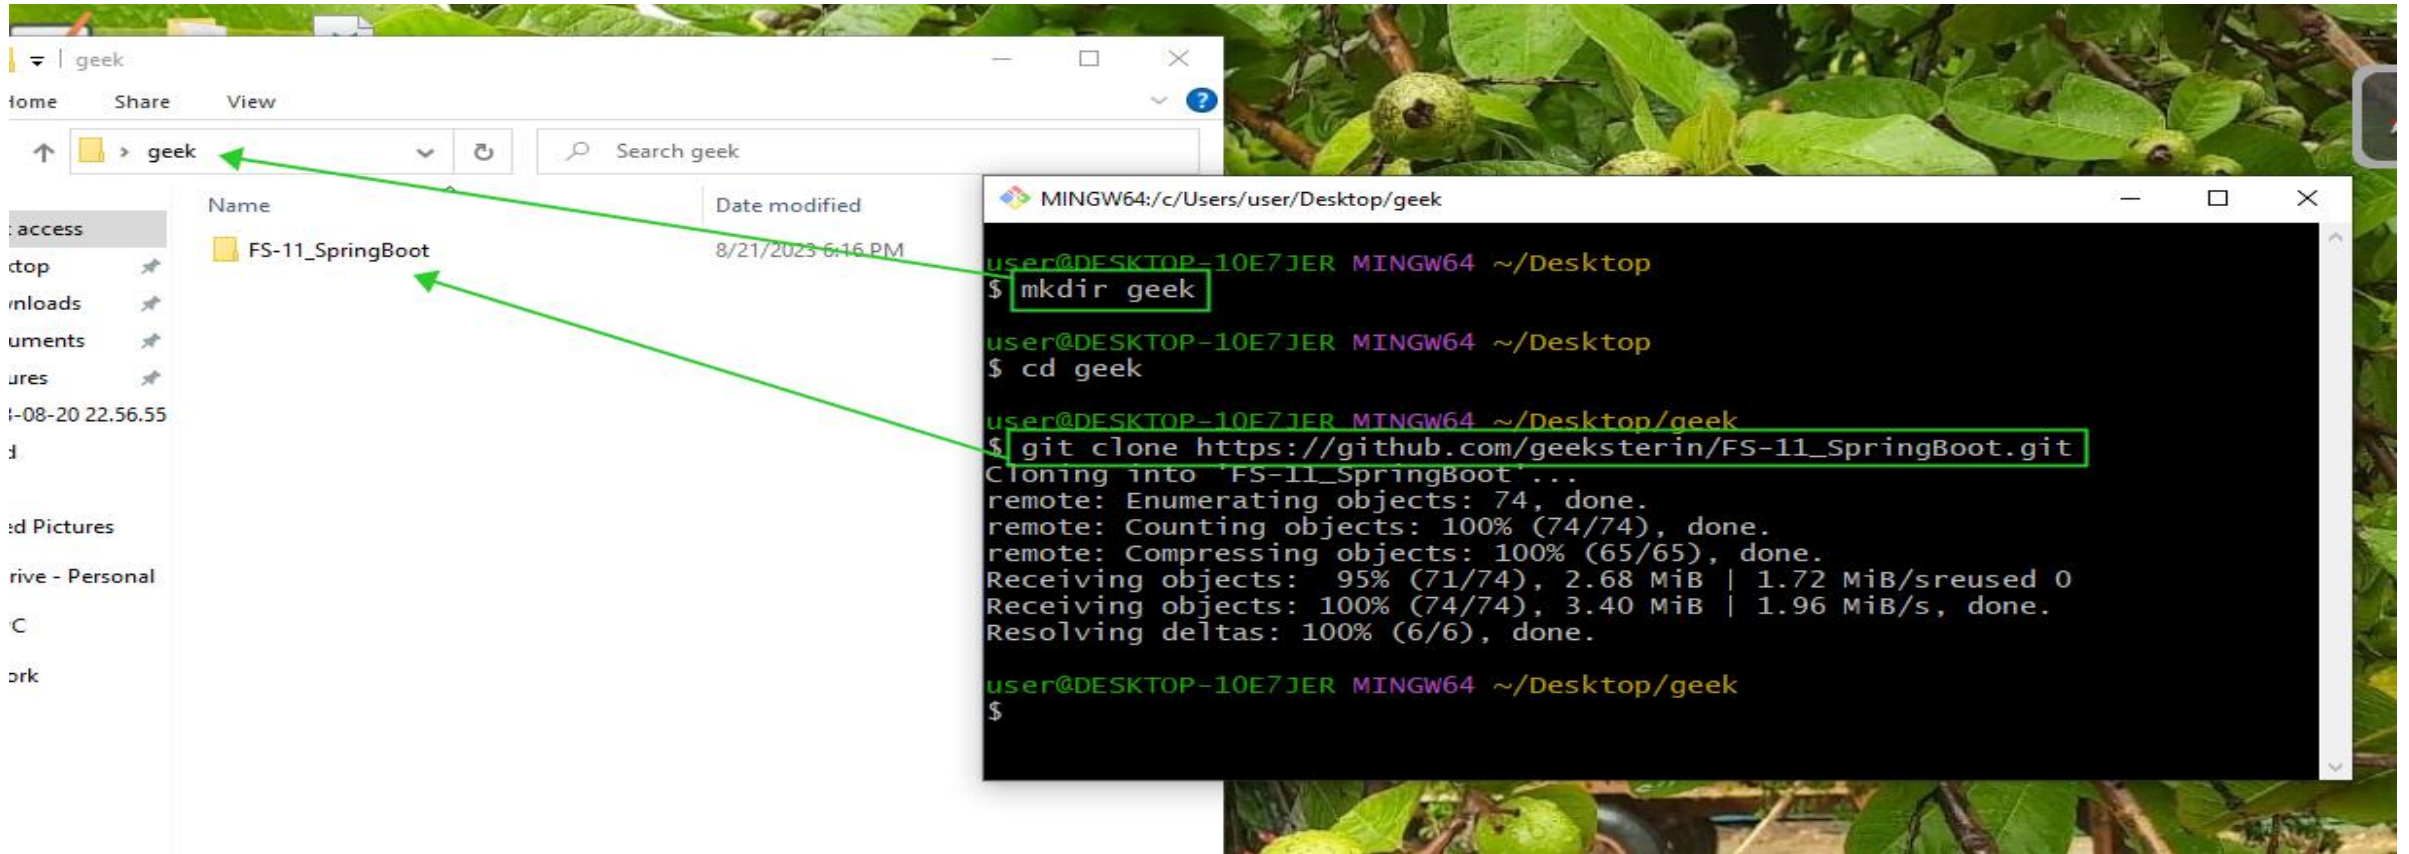

```
user@DESKTOP-10E7JER MINGW64 ~/Desktop
$ cd geek
```

```
user@DESKTOP-10E7JER MINGW64 ~/Desktop/geek
$ git clone https://github.com/geeksterin/FS-11_SpringBoot.git
```

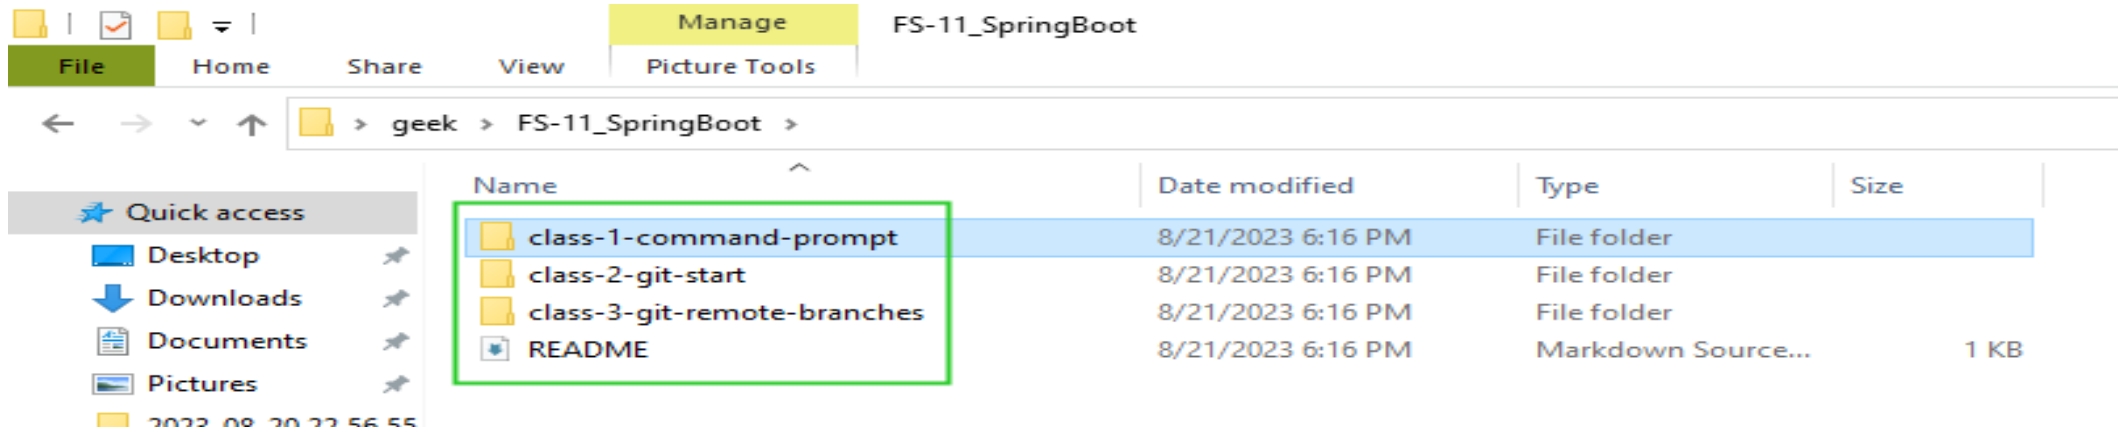

Confirm cloning data

1 :- Go inside and check data

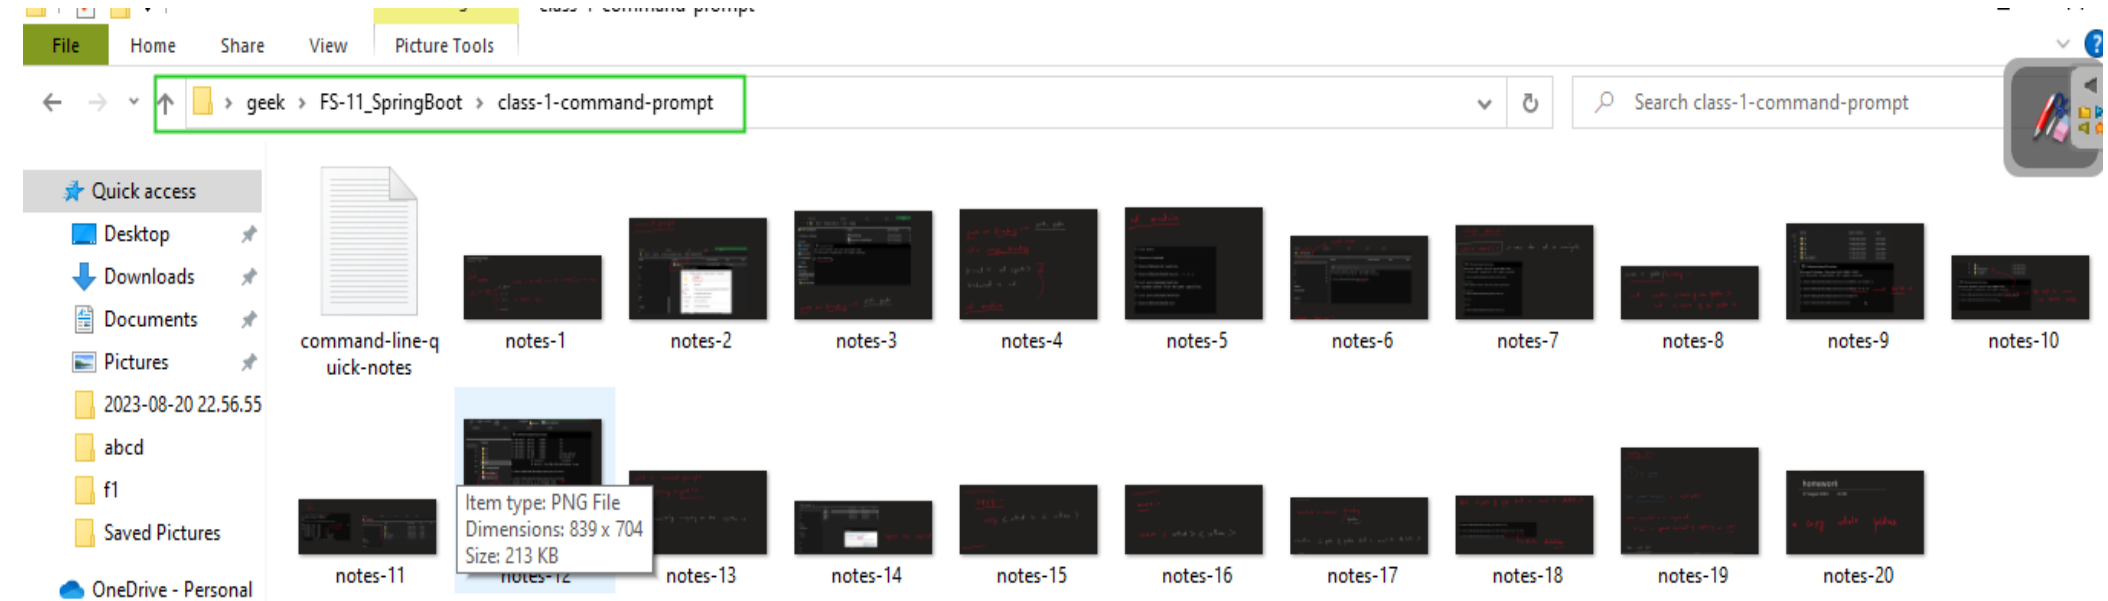

Data Stored
